BUSINESS AUTOMATION

CLAUDE CODE AUTOMATION

TOOL DEMOS

Real tools I have built, shown with private details blurred.

- Workflow automation
- Custom tools
- App connections
- Scheduled tasks

500+ PROJECTS | **5.0** RATING

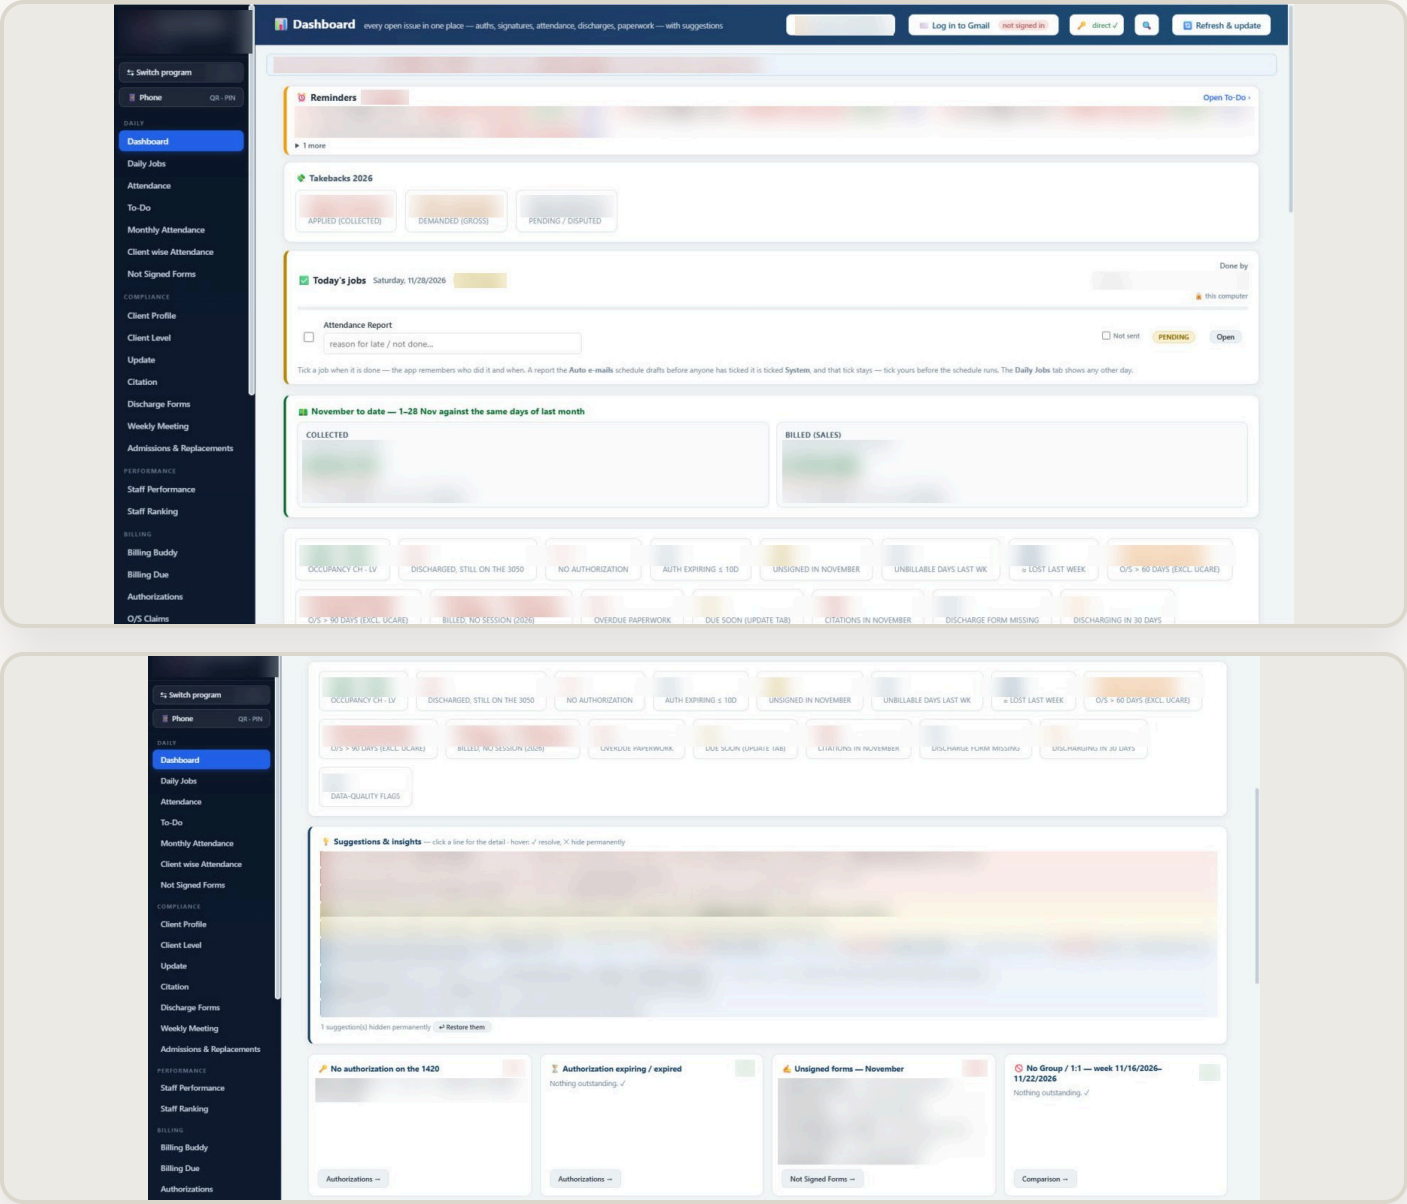

SOURAB SAHA

COMPLIANCE DASHBOARD APP

TOOL DEMOS

WHAT IT DOES

- One dashboard for every open issue: authorizations, signatures, attendance, discharges and paperwork
- One button pulls the latest data from the records system
- A suggestions list says what to fix first, with one click to the detail
- A daily jobs checklist remembers who did what and when
- Report emails are drafted on a schedule
- Runs as a desktop app on the team's own computers

A desktop tool I built for a care provider. All names, amounts and counts are blurred.

ACCOUNTING TOOLS

TOOL DEMOS

02 Personal accounting app

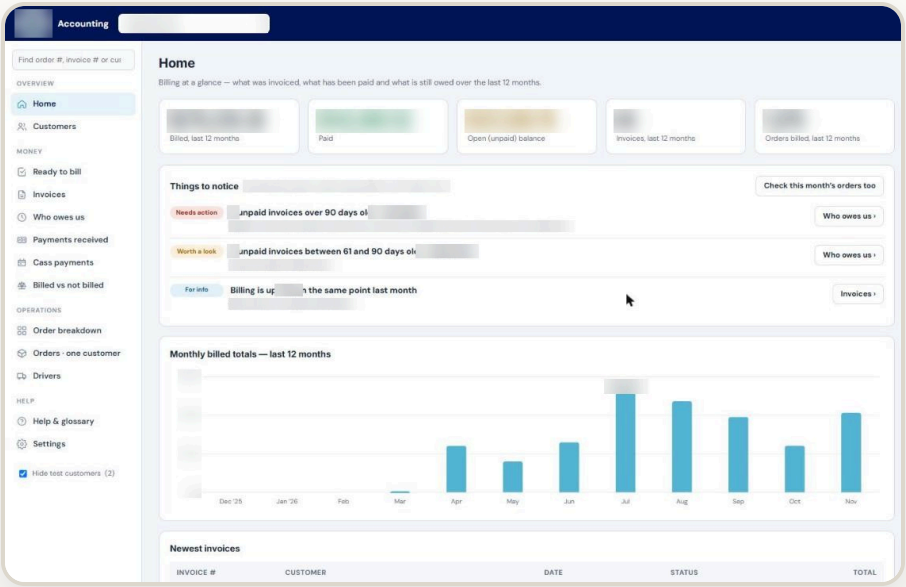

- Imports bank and card statements with one button
- Money in, out, saved and invested for any period
- Every transaction sorted into heads and payees
- Reminders before each renewal or card charge

My own app, shown with my real books. Card numbers and other people's names are covered.

03 Billing and invoicing web portal

- Billing at a glance: invoiced, paid and still owed
- Flags unpaid invoices by age, so you know what to chase
- Pages for ready-to-bill orders, invoices and payments
- Excel and PDF export on every report

A web portal I built for a delivery company. Names and amounts are blurred.

Message me here with your task before you order.

I confirm the scope and a fixed price first.

I am an independent freelancer and not affiliated with Anthropic.
